Numbers highlighted in yellow have changed since the last report.

<sup>\*</sup>Data suppressed (1-4 diagnoses of HIV).

<sup>^</sup> Cases with self-reported injection drug use as an exposure category and those attributed to male-to-male sexual contact *and* IDU (both risk factors reported), and those infections linked to IDU (person did not report IDU as a risk factor but is linked to a person whose diagnoses is attributed to IDU).

<sup>&</sup>lt;sup>4</sup>Data are preliminary. Data will be released monthly and are subject to change as information continues to be collected and analyzed.
